Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the post-census data publication process. The Bureau was guided by Director, **Bruce Chapman**, and Deputy Director, **C.L. Kincannon**. Primary direction of the data publication program was performed by **William P. Butz**, Associate Director for Demographic Fields, assisted by **Peter A. Bounpane**, Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Bailar**, Associate Director for Statistical Standards and Methodology; **Howard N. Hamilton**, Acting Associate Director for Information Technology; **James D. Lincoln**, then Associate Director for Administration; and **Stanley D. Moore**, Associate Director for Field Operations. The Director's staff was assisted by **Sherry L. Courtland**. Direction of the census enumeration and early processing activities was provided by **Vincent P. Barabba**, former Director; **Daniel B. Levine**, former Deputy Director; and **George E. Hall**, former Associate Director.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census was in the Decennial Census Division under the direction of **Stanley D. Matchett**, Chief, assisted by **Rachel F. Brown** and **Roger O. Lepage**, Assistant Division Chiefs. The following Branch Chiefs were responsible for support services: **Donald R. Dalzell**, **H. Ray Dennis**, **Stephen E. Goldman**, **Dennis W. Stoudt**, and **Richard R. Warren**.

The Residential Finance Survey was planned and directed and this report written in the Housing Division, under the supervision of **Arthur F. Young**, Chief; **Leonard J. Norry**, Assistant Chief; and **Peter J. Fronczek**, Branch Chief. Technical advice was provided by **Betty E. Kent**. Important contributions were made by **Sheryl L. Barnard**, **Adele Bly**, **Charles W. Clark**, **Alan Friedman**, **Margaret W. Harper**, **Michael Jones**, **Diane Murphy**, **Pamela C. Robinson**, and **Anne D. Smoler**.

Specifications for selecting the survey sample and the weighting, ratio estimating, and variance specifications were developed in the Statistical Methods Division under the supervision of **Charles D. Jones**, Chief; **Susan M. Miskura**, Assistant Chief; and **James Dinwiddle**, Branch Chief, assisted by **Richard Griffin** and **Robert Edson**.

The manual processing and data keying of questionnaires were performed in the Data Preparation Division, **Don L. Adams**, Chief, under the supervision of **Theodore Sands** and **George Wilson**, Branch Chiefs. Contributions to the clerical processing were made by **Virginia Douglas** and **John Rausch**.

Computer processing was performed in the Computer Services Division, **C. Thomas DiNenna**, Chief; **James E. Steed**, **George M. Bowden**, and **Joseph F. Sferrella**, Assistant Chiefs.

Publications editing, design, composition, and printing procurement were performed by

the staff of the Publications Services Division, **Raymond J. Koski**, Chief; **Milton S. Andersen**, **Arlene C. Duckett**, and **Gerald A. Mann**, Branch Chiefs.

Many other persons participated in the various activities of the 1980 census and the 1981 Residential Finance Survey. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

GENERAL

This report presents statistical summaries of data from the Residential Finance Survey conducted in 1981 as part of the 1980 Census of Housing. Legal provision for this survey was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

Detailed information is shown on the financing of homeowner, condominium, and rental properties, including characteristics of the mortgages, properties, and property owners. The data shown relate to the geographic boundaries as they existed for the 1980 census and are presented for the United States total, the United States totals inside and outside standard metropolitan statistical areas, the United States totals by size of place inside and outside standard metropolitan statistical areas, and for the four census regions.

The content and procedures of the 1981 survey are similar to those used in the 1971 Residential Finance Survey. However, the scope of the survey was expanded in 1981 to include homeowner condominium properties. In addition, a few items were added and some changes made in existing items to improve the usefulness of the survey results. For most of the characteristics shown in this report, the changes do not affect the

comparability between the 1971 and 1981 data to any appreciable extent.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233.

CONTENTS OF THE REPORT

This report contains text (this introduction and six appendixes), a table finding guide, a table of contents, maps, charts, and detailed tables. The table finding guide lists the subjects covered in this report and shows the tables in which the various types of data appear.

A summary table on a limited number of key items for each property type group for the United States and regions is presented in Chapter 1. Chapters 2 through 5 present tables for 1-unit homeowner properties by race and Spanish origin of owner. Chapter 6 is for homeowner condominium properties. Chapters 7 through 9 present tables for rental and vacant properties by property size.

The appendixes appear after the data tables in this report. Appendix A describes the area classifications (e.g., incorporated places, urban and rural residence). Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C summarizes the data collection and processing procedures used during the 1981 survey. Appendix D presents information on sources of error, sample design, sample size, ratio estimation, sampling variability, and standard errors. Appendix E provides facsimiles of the questionnaires. Appendix F summarizes the data dissemination program of the 1980 census.

DERIVED FIGURES

This report presents means, medians, and percents as well as certain rates and

ratios. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts: one-half of the cases fall below the median and one-half of the cases exceed the median. For all types of derived figures in this report, the figure is not presented (but indicated by three dots "...") if there are fewer than 25 sample properties in the base.

The median is computed on the basis of the distribution shown in this report. When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than \$5,000," it is shown as "\$5,000-." When the median falls in the upper terminal category of an open-ended distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; thus, for example, if the median falls in the category "\$150,000 or more," it is shown as "\$150,000+."

The mean is obtained by aggregating the amounts for all properties and dividing by the total number of properties. Aggregates, when not published, may be approximated by multiplying the mean by the number of properties.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

- A dash "-" signifies zero or a percent which rounds to less than 0.1. For tables in which data are shown in terms of thousands of properties, cells with less than 500 properties contain dashes. Similarly, for those tables in which data are shown in millions of dollars, data cells with less than \$500,000 contain dashes.
- Three dots "..." mean not applicable or that derived measures are not shown

when the base is less than 25 sample cases or that the data are being withheld to avoid disclosure of information for individual properties.

- SMSA is standard metropolitan statistical area.

COMPARABILITY WITH PREVIOUS RESIDENTIAL FINANCE SURVEYS

The 1981 Residential Finance Survey is the latest survey of residential mortgages conducted by the Bureau of the Census. Similar surveys were conducted in connection with the 1950, 1960, and 1970 censuses and, in a more limited fashion, in 1956.

As early as 1890, the Bureau (then the Census Division of the Department of Interior) collected detailed statistics on residential mortgages.¹ In the 1920² and 1940³ censuses, mortgage questions were asked of owners who occupied their own homes. For the first time in 1950⁴, the census included a separate survey on residential financing, very similar to the current program. Data on mortgages, properties, and owners were collected for both owner-occupied and rental properties. In 1956⁵, as part of the National Housing Inventory, an interim survey was made of the mortgage status of owner-occupied properties having from one to four dwelling units.

Prior to 1950, mortgage data were limited to owner-occupied properties. In 1950, 1960, and 1971, as in 1981, rental properties were included and information was obtained from mortgage lenders. Rental properties were not included in the 1956 interim survey. As part of the 1981 Residential Finance Survey, mortgage data on owner-occupied condominiums were collected for the first time.

The subjects covered in the 1981 report are nearly the same as those in 1971. Only one item found in the 1971 report has been deleted in 1981—mortgagee participation in property income. Subjects added in 1981 include data on variable interest rate and graduated payment mortgages, the existence of prepayment penalties and clauses regulating mortgage assumption, unexpired term of first mortgage, purpose of second mortgage placed later than acquisition, ownership status, and Spanish origin of owner. In addition, a table has been added presenting data separately for insured conventional mortgages from other conventional mortgages.

Rental receipt data for 1981 differ from those in 1971 in that cooperatively owned properties are excluded from the tabulations. Also, rental receipts per housing unit exclude business receipts in 1981.

The table on form of debt, for rental and vacant properties, has been expanded to show wrap-around mortgages separately. The geographic detail presented in the 1981 report is the same as in 1971.

RELATION TO THE 1980 CENSUS

The 1981 Residential Finance Survey is part of the 1980 Census of Housing and provides information on the financing of homeowner and rental properties not covered in other 1980 census reports. Certain of the property and owner characteristics for which data are presented in this report are also presented in other 1980 Census of Housing publications and the definitions are generally the same. However, there are some differences.

The basic unit of tabulation in the Residential Finance Survey is the property; in the 1980 Census of Housing, it is the housing unit.

This has a particular significance for the 1-unit homeowner property data. In the census, a 1-unit owner-occupied housing unit is just that. In the Residential Finance Survey, such a unit may be covered by a mortgage which also covers another housing unit. Therefore, it becomes part of a 2-housing unit property. Thus, in this volume, the number of 1-unit homeowner properties may differ from the number of 1-unit owner-occupied housing units in other 1980 census reports.

The Residential Finance Survey is restricted to nonfarm, privately owned residential properties. The 1980 housing census includes all housing units regardless of location or type of ownership. (See appendix B for a description of properties excluded from the Residential Finance Survey.)

The residential finance data were collected in 1981; the 1980 housing census data a year earlier. This difference in timing contributes to some of the differences between the two programs in data relating to property and owner characteristics.

The monthly rental receipts tabulations in this report are based on the average rent of all housing units per project. In the basic housing census reports, the monthly rent data are tabulated for each of the individual rental housing units.

The Residential Finance Survey is based on a sample selected from 1980 census records of housing units located in the areas then used for the current demographic survey programs. Data for the census of housing, on the other hand, are based on a complete count of all housing units for some items and on a systematic sample of housing units for other items.

COMPARABILITY WITH DATA FROM OTHER SOURCES

Comparability of the data in this report with data from other sources is affected by differences in definitions, timing, coverage, method of enumeration, and sampling variability.

Comparisons with data from other sources must take into account the fact that statistics in this report, although collected in 1981, relate to privately owned, nonfarm residential properties in the housing inventory at the time of the April 1980 decennial census enumeration. Excluded from this report, therefore, are such properties which came into the housing inventory in the period between the 1980 decennial census enumeration and the Residential Finance Survey enumeration in 1981.

In those cases where the current owner was buying the property under a purchase contract and the property was still encumbered with a mortgage being repaid by the former owner, the data in this report relate to the purchase contract

debt created by the new owner. Conversely, in the mortgage data compilations of other organizations and government agencies, the data in such "dual-debt" cases are based on the underlying mortgages. Similarly, in cases where one or more mortgages become encompassed by a "wrap-around" mortgage, data in this report are shown for the "wrap" mortgage only. Other organizations, if they include "wrap" mortgages at all in their data series, are also likely to include data on the underlying mortgage(s).

The Federal Home Loan Bank Board prepares monthly estimates on selected characteristics of conventional mortgages based on mortgage loans closed during the first five days of each month. These data reflect loans originated by savings and loan associations, mortgage bankers, commercial banks, and mutual savings

banks, but do not include loans made directly by noninstitutional investors such as individuals or construction companies which are covered in this report.

The Federal Housing Administration (FHA) of the Department of Housing and Urban Development compiles data on the number and amount of mortgages with insurance in force insured under its several programs. Comparability of data in this report with FHA statistics is limited not only by the difference in timing but several other factors.

In FHA reports, the statistics are classified according to the two major groups of insurance programs—home mortgages and multifamily housing mortgages. FHA home mortgage data include renter-occupied properties. FHA multifamily housing mortgage data include mobile home courts, nursing homes, and land

development activities, which are out of the scope of this survey. Also excluded from this survey are FHA mortgaged properties which were under construction at the time of the 1981 Residential Finance Survey and those owned by Federal, State, or local agencies.

Mortgage amounts in the FHA compilations of mortgage holdings by type of lender are original face amounts and do not reflect repayments or unpaid interest as do the outstanding debt figures in this report.

Estimates of the amount of mortgage debt outstanding on mortgages guaranteed by the Veterans Administration are made periodically by that agency based on operating records. These estimates are derived from data on number and average amount of loans closed and include rental properties.
